EDUCATION

VIT Bhopal University

2023 – Present

B.Tech in Computer Science and Engineering — CGPA: 8.75

FIITJEE Junior College

2020 – 2022

Intermediate (11th & 12th Grade — 77.4%)

Visakha Valley School (CBSE)

2019 – 2020

10th Grade — 82.8%

ACADEMIC PROJECTS

Multiple Disease Prediction System | *Python, Scikit-learn, Streamlit*

- Designed and implemented end-to-end machine learning pipelines to predict Diabetes, Heart Disease, and Parkinson's using structured healthcare datasets.
- Performed data cleaning, handling of missing values, feature engineering, and exploratory data analysis (EDA) using Pandas and NumPy.
- Trained and evaluated multiple ML models including Logistic Regression, SVM, and Random Forest to select optimal classifiers.
- Assessed model performance using accuracy, precision, recall, and F1-score metrics.
- Deployed trained models through Streamlit to provide real-time disease risk predictions via a user-friendly web interface.

Credit Card Fraud Detection | *Random Forest, Scikit-learn*

- Built supervised machine learning pipeline to detect fraudulent transactions from highly imbalanced financial datasets.
- Applied preprocessing techniques including normalization, feature scaling, and class balancing to improve model robustness.
- Compared Logistic Regression, Decision Tree, and Random Forest models to identify best-performing classifier.
- Evaluated models using confusion matrix, ROC-AUC, precision, recall, and F1-score to minimize false negatives.
- Visualized transaction patterns and fraud distributions using Matplotlib for analytical insights.

Movie Recommendation System | *Machine Learning, Python*

- Developed personalized movie recommendation engine using collaborative filtering and content-based filtering techniques.
- Extracted textual features using TF-IDF and computed cosine similarity for item similarity scoring.
- Performed dataset preprocessing, feature extraction, and similarity matrix generation using Pandas and NumPy.
- Designed recommendation pipeline to suggest top-N movies based on user preferences and viewing history.
- Improved recommendation accuracy by tuning similarity thresholds and feature weighting.

TECHNICAL SKILLS

Programming Languages: Python, C++

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, PyTorch

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn

Web & Deployment: Streamlit, Flask

Databases: MySQL, SQLite

Tools: Git, GitHub, Jupyter Notebook, VS Code

CERTIFICATIONS

Introduction to Machine Learning — NPTEL

Bits and Bytes of Computer Networking — Coursera
